

# Versatile Firefighting Equipment - Hellbeater 600

The Hellbeater 600 by Fischcon is a **powerful, self-contained diesel-driven firefighting pump unit**, designed for demanding operations across industries - from fire departments and offshore installations to ports, harbors, and municipalities. With hundreds of units in service worldwide, it delivers proven reliability in critical environments.

## Compact Footprint

Perfect for urban or historical city centers, the Hellbeater 600 fits tight spaces and draws water from local sources like canals or harbors.

## Exceptional Firefighting Reach

Equipped with a manually operated fire monitor capable of a 120-meter throw. Optional multiple outlets ensure adaptability to operational needs.

## Long Runtime

The integrated base-frame fuel tank supports up to 6 hours of

full-load operation - ideal for extended deployments without refueling.

## Built for Mobility

Engineered with forklift pockets and lifting lugs, it's easy to transport, position, and redeploy - even in challenging environments.

## Durable, Field-Ready Design

A rugged, heavy-duty cage protects internal components and ensures resilience under harsh field conditions.

**Multiple configurations and customization options are available.**
